

# **FINGER/HAND**

## **LIGAMENT/TENDON INJURY**

1. Use small loop, loop or extremity coil
2. Place Vitamin E capsule superficially on the area of interest if necessary
3. Use STIR if need as alternative to T2 fat saturation
4. Immobilize part within coil

**(1) SCOUT**

**(2) COR PD HYBRID FS**

**(3) [ ] SAG T1 SE –(if tendon or pulley injury = anterior or posterior pain)**

**[ ] COR T1 SE – (if collateral ligament injury = lateral pain)**

**(4) SAG PD HYBRID FS – thru area of interest**

**(5) AXIAL PD HYBRID FS use sat band to null arterial pulsatile artifact**

**(6) COR 3D T1 GRE thin 1-2mm**

**(7) AXIAL PD HYBRID non FS**

**Optional**

**Cor STIR if poor fat sat**
